Innovation Project

RECONNECT

Where your Story Matters.

INTRODUCTION

About This Project

This project functional UX and UI Designer to overcome the immense difficulty, broad minded and interactive and advanced UI Design.

GET STARTED

Overview

This application revolves around putting mental health first and eliminating stigma around it. With features like peace corner and journal section, Reconnect works to provide stable calm on days which are not so much. It is made simply to entertain daily needs of the user. It's app that provides easy understanding around the app. Reconnect majorly works on bringing therapy to your finger tips.

Platform

Android

The Story

Lack of mental health application made the author eager to develop an app that enables users to learn more about their mental peace and have easy access to therapy in real time.

Preparation

DESIGN PROCESS

Ideate
Turn idea from concept and inspiration to draft

Design
Sketch out the product to align the user needs

Develop
Convert the designs into a live application

Deploy
Launching the application to the market

Design Flow
1. Research & Analysis
2. Wireframe & Prototype
3. Testing

Development
1. Develop
2. Testing
3. Deploy

Information Architecture

People often use the word "Information Architecture" to mean the meatrow or website or apps, but thats not really correct. while there are a part of it, theyre only only one part of it. Information architecture is all about organization of information in a clear and logical way. such organization follows a clear purpose helping users navigate complex sets of information
